Net contents: 1g GA3/100g Treehance

Net Weight: 120g

Container Size: 120g

Effect: Promotes growth of stem and branches. Diligent use can increase the size of the tree in a short period of time. 2-3 years of growth may be realized over a single growing season.

Recommended: For growers and wholesalers. Application of TREEHANCE as a concentrated waterproof paste can rapidly increase growth of trees and enable the tree grower to bring the trees to market earlier. Promotion of rapid growth of the tree can also benefit the fruit grower as it can accelerate the maturity of the tree and enable it to produce fruit much earlier.

Application:

- Apply as a band immediately below the Apical Meristem.
- Re-seal container when not in use and store in a cool, dry area.

Instructions for use:

- Apply in early spring once the Apical bud starts to develop.
- Apply regularly at 4-week intervals throughout the growing season.

Precautions: Keep out of the reach of children. Do not get into eyes or on skin. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
